

One Platform. Every Format.

EZ DICOM DISTRIBUTOR

SST's EZ DICOM Distributor changes that by seamlessly integrating into EMR's that support FIHR, such as Epic MyChart® and Cerner MyHealth®. Patients are now empowered to instantly and securely access their radiology images — while still supporting traditional optical media pickup when needed. By offering both encrypted digital delivery and physical media through one unified workflow, health systems can reduce operational costs, boost patient satisfaction, and improve their security posture.

Test Results List

TRANSTHORACIC ECHO (TTE) COMPLETE

Results

Study Result
Result Text

- Left ventricle ejection fraction is normal.
- Septal wall has abnormal motion consistent with post-operative status.

Here is the interpretation summary text.
