## 1. New features

### 1.1 SKIN DOSE FEATURES

- New column related to the Peak skin dose:

- Set the Region in percentage for the Peak Skin Dose

812-333-0059

Add Peak skin dose values in statistics:

Threshold percentage ( $91.07 \%$ of conformity)

## - New icon in the configurator

## Institution <br> CLINIC

### 1.2 NUCLEAR MEDICINE

Ability to select the radiopharmaceutical in the 'organ dose' page.

812-333-0059

### 1.3 ALERT MANAGEMENT

- Addition of patient conditions (Age, BMI, Weight) for the patient cumulative dose.

- A new column has been added to incorporate the initial alert level, which will serve as a reference in case the DRLs are modified. This column can be activated or deactivated through the configurator.
- Addition of factor levels for the DRL using the automatic alert rules

- Capability to include a new criterion called "Acquisition type" within the configuration settings for acquisition alerts
